Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 7, 8, 11 and 12 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 11 and 12 of copending Application No. 11/214660. Although the conflicting claims are not identical, they are not patentably distinct from each other because both teach a system for providing power to multiple ultrasonic probes using programmable logic devices. However the '660 claims do not teach a relay for switching

It would have been obvious to one of ordinary skill in the art at the time of the invention to employ a relay as is convention in the art to switch from providing power to the first probe to providing power to the second probe.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 6-9 and 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Lemelson (USPN 3559257).

Lemelson teaches a system for providing power to multiple ultrasonic welding probes from a single power supply using an automatic control system (col 1 lines 34-50, col 2 lines 25-52 and col 10 lines 5-28), a programmable logic component and relay (col 6 lines 31-61) for switching power between probes (col 4 line 29 – col 5 line 71, col 8 line 25 – col 9 line 2).

Allowable Subject Matter

5. Claims 4, 5, 10 and 15-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Vala et al. (USPN 6251203 B1, multiple power supplies), Stumpf (USPN 4401501, multiple power supplies) and Jones (USPN 3029766).
